

Submitter: Kimberley Bullard

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

As an OBGYN physician, I am privileged to care for persons in some of the more vulnerable and critical moments in their lives. I am proud to provide this in a state that is committed to ensuring access to vital care and opens its doors to persons from out of state who are forced to travel due to increasingly restrictive policies and resulting gaps in access to treatment and care. I offer this testimony in order to affirm the notion that patient care is the realm of the patient and their physician and that politicians and special interest groups lack the perspective and expertise to safely dictate what care is critical, essential, or appropriate. I fully and unreservedly offer my full support for HB 2002.
