Measure: HB2005

NO on HB2005. There is sneaky language in here that will force lawful gun owners to serialize nearly every single part on their firearms. Requiring a background check to buy something as simple as a barrel or hand guard. This is not going to save any lives, it will harm local businesses and restrict lawful gun owners freedoms. We have safe storage laws, we have background checks, we have consequences for guns stolen from gun owners. This is unnecessary and any gun owner who knows the laws can clearly see that. More serial numbers on the same gun will not prevent the drug turf wars we have seen since Measure 110 passed. Address the fentanyl overdoses and deaths which actually are killing people.
