

Submitter: Brian Hudspeth  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB2006

Committee members,

I urge you to oppose this legislation. Our problem with firearms in this country does not have anything to do with the "tool". It's a public health issue, and time and money spent on bills like this is a waste, and would be much better spent looking to solve the real problem, the human beings! If 18 year olds can go and fight in our country wars, pay taxes and are otherwise considered adults, then they should be have the same constitutional rights as adults. If the state legislature feels that 18 year olds are not adults, then I suggest you work on changing the age of adulthood to 21, or 25 or whatever age you feel people actually become responsible for their own actions!
