

Submitter: Michael Bell

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB320

When you hear people are in prison with little to no evidence, it concerns me about our justice system. First is our system just?

I used to think so and for the most part I still believe it is. We need to give people hope. Our system does not that, I do believe there are men and woman in prisons that had a one time screw up and their lives are ruined for the rest of it. It is time to have grace on those that are not a threat to our society. Repeat offenders should not get out, they seem to not get the point. Murders need to pay their time. I have witness multiple people in prison for different reasons with little to no evidence. We need to be evidence based. Thank you for listening to me. Mike
