

Submitter: Loretta Epp

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB872

A huge proportion of the land in Oregon is owned by the federal government. Most federal legislation puts restrictions on the use of these lands without considering the consequences.

Fire prevention and economic utilization of these lands must be the responsibility of the landowner, the Federal Government. Allowing these lands to be overgrown, infested with both disease and insects, while preventing access or appropriate management of these lands is irresponsible.
