Measure: HB2004

In observing other states with Rank Choice Voting, people I know in those states find this very confusing, the results are that less people want to participate, and the winner can sometimes be a big shock. I do not view this as a better way of selecting a winner than what we have. We need straight forwards, easy to understand voting processes, with utmost security and integrity as to trusting the outcome of the election. This method does not do any of that.
