

Submitter: Stephanie Sari

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

As a pediatrician serving many members of the LGBTQI+ community I absolutely support this bill protecting the rights of children to gender affirming care. I have personally seen the turn around in mental health when patients feel listened to and affirmed and this bill continues to protect providers like me when practicing evidence based care that saves lives. Please vote in support of this bill.
