

Submitter: Erin Kirk

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I have been a manager in Oregon community health center's for over 23 years where I work to support and protect the missions of health centers and ensure access to high quality care for all. I support HB 2002 to protect our providers' ability to provide care to all patients seeking reproductive healthcare and gender affirming care in Oregon. We must protect, expand and enhance access to care to be sure that especially our most medically-underserved and vulnerable people and regions of our state have access to life-saving healthcare. Passing HM 2002 is essential to the lives of all Oregonians.

Thank you!
