

Submitter: L H

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

I'm 42 years old. And have been smoking sense I was 15. And with flavored vapes. Thus is the first time I've been cigarette free ever. My house, my car and my clothes no longer smell like smoke. People can't tell I'm a smoker because of vape. As a adult in America should be able to choose what tobacco products I use. But I see alcohol flavored Popsicles at the end of the chip and cookie isle at the grocery store. It's wrong to pick and choose what adults get to do. But leave other evils alone.
