

Submitter: Kay Pendleton

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I support the passage of SB 85 with the -1 option allowing an eight-year period to evaluate the expansion of Contained Animal Feeding Operations in Oregon. The -3 option is not adequately protective and will not protect our community from industrial chicken operations. The testimony in the previous two hearings attest to the fact that CAFOs will do great damage to our water supply and air quality. Please move the -1 amendment out of committee.
