

Submitter: Richard Shaw
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

I strongly oppose this bill. The things that are done as a way of life and tradition from generations of family heritage will now have to be taken care of on the tax payers dime. This bill is put forth from people that don't understand the long reaching effects and are basing the bill on their feelings. There will be many products that will have to be made from synthetic and petroleum based products if this were to pass. That is doing nothing to help the environment. Adding trash to the landfills and environment that will not disintegrate as natural products would. The positions held in this office were made to represent all people of Oregon, not just the people that live in the city and don't understand our way of life in the country. Please include us, the country people and our wishes.
