

Submitter: Sharon Green

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

As a pediatrician and pediatric hospitalist I support this bill. We need all the protection we can get for access to care - in this case reproductive care including gender affirming care. There are risks to children, teens and their families when reproductive rights are not upheld - families of all kinds need legislative support to protect their medical rights and we as Oregonians should lead the nation on this path.
