

Submitter: Jim Ball

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

This initiative is very unwarranted. I have been a trapper for 15 years and have enjoyed this heritage for many seasons now. The harvesting and selling of fur has been an important part of this country's history and growth. Taking the use and sale of fur and fur products in Oregon would be like taking a piece of history and throwing it out the window. We have faith that the Game and Fish authorities will continue to practice good wild fur management as us trappers and sportsman do. By taking the use and sale of fur it hurts so many outdoors people. Please say NO to this bill.
