

Submitter: Pamela Wadsworth

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Even cavemen/women relied on animals for food. This bill is taking a right away from us to decide what we want or need to eat to be healthy. No one should be told what to eat or not to eat. No one should be able to control this. And when you think about it, when you pick fruit or vegetables or ANY plant, it dies. Some recreate much like animals do. It is called a seed. Stop this bill.
