

Submitter: Mariah Leung

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

A question we might ask; What could be the real agenda behind this dangerous effort to do away with parental rights and further fracture the family?

"For this article, Reuters spoke to 17 people who began medical transition as minors and said they now regretted some or all of their transition. Many said they realized only after transitioning that they were homosexual, or they always knew they were lesbian or gay but felt, as adolescents, that it was safer or more desirable to transition to a gender that made them heterosexual. Others said sexual abuse or assault made them want to leave the gender associated with that trauma. Many also said they had autism or mental health issues such as bipolar disorder that complicated their search for identity as teenagers."

"Echoing what MacKinnon has found in his work, nearly all of these young people told Reuters that they wished their doctors or therapists had more fully discussed these complicating factors before allowing them to medically transition."
