

Submitter: Dennis Hebard
On Behalf Of: Firearm literacy police
Committee: House Committee On Judiciary
Measure: HB2005

The descriptions of a receiver are wrong they describe a action as on bolt action, leaver, pump action

or with handgun a slide or barrel single, double, striker action are not the receiver But the description is too broad and unclear.

Many handguns are polymer based receivers especially popular 9mm these would be immediately outlawed under the non-detectable firearm definitions. These descriptions and definitions were not written by experts or were meant to be deceptive.
