

Submitter: Ayla Hofler

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

As a nurse for 40 years, I can't believe you are creating this bill to destroy a child's life forever! Our children are not your social experiment lab rats. This is all about sterilizing and destroying mother child bonding when roses make and female children become adults. You are ruining our family life and trying to take complete control of our very existence in the name of an EMERGENCY!! I am so sick of you democrats abusing that term to give yourselves immediate , unfettered authority to destroy our freedoms and RIGHTS as parents. You hate humans because of your baseline climate change phobia. You are a part of the global agenda to decrease population in any way you can! Keep your hands off our kids!
