

Submitter: Emily Herbert

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Dear Chair Golden and Committee Members,

I'm writing in support of SB85 with the -1 Amendment. As a life long supporter of my father's practice of "always leave a place better than you found it", I see the impacts of large factory farms astounding in their harm to the places and people where they are located as well as downstream. The industrial approach to animal agriculture must be paused while we assess the many intersecting impacts of air and water pollution on the land and the routinely marginalized persons on the front lines of impacts. I come from a family of small family farmers who are being driven out of business by the industrial takeover of smaller operations by the agricultural giants who care only for their bottom line. Please do the right thing for the Common Good and pass out SB85-1

Thank you for you ongoing committment to the good for all Oregonians.

Emily Herbert
