

Submitter: Angela Conner

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2007

I oppose bill HB 2007. This bill is a disgusting example of government outreach. We as citizens of the USA are protected under the second amendment to have the right to bear arms. If a citizen has undergone the background check and the classes with law enforcement or a trained and certified professional to obtain a concealed handgun license, then they should not be limited on where they can carry. I for one feel much safer when I know that people who are law abiding have a means to stop or dissuade a possible threat to those around them. If you tie the hands of law abiding citizens to carry then all that will do is empower and enable criminals to carry out their acts of violence. Why not? Who would be able to stop them? The police can not be everywhere at all times. But if you have citizens carrying a concealed weapon where ever they are, then I guarantee that criminals will think twice when they know that they can be stopped. Again this is common sense. Thank you for your time.
