

Submitter: Marilyn Keller  
On Behalf Of: Chief Petitioner  
Committee: House Committee On Judiciary  
Measure: HB2005

Undetectable weapons in an already inundated society only delay the process of building safer communities. Please pass this bill banning the manufacture and sale of these weapons. An undetectable gun is just as deadly in the hands of anyone seeking to use them. I believe that a federal ban is necessary. The parts should be interdicted and a fatal flaw should be inserted into the print and manufacture programs- rendering them inoperable.
