

Submitter: Emily Peterson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

As a mother, nurse, and concerned citizen I urge you support HB 2005. In less than one hour, undetectable components become fully functioning, untraceable firearms ("ghost guns"). A person can buy the parts and assemble a ghost gun without even receiving a background check. They are becoming a weapon of choice for violent criminals, gun traffickers, and other legally prohibited persons. We must take immediate action to regulate ghost guns.
