

Submitter: Carole Daley

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

As the public becomes more aware of how we can improve the quality of life for everyone by instituting measures supporting cleaner air, healthier lungs and less noise pollution, the successful implementation of these standards is not only possible, but probable. I've lived in communities prohibiting the use of leaf blowers and while the city employees used only brooms and rakes, private homes were spotty in their adherence to this major improvement in everyone's standard of living. But it is the right thing to do! Thank you for your hard work on this sensitive issue.
