Committee: House Committee on Judiciary
Measure: HB2007

I Oppose HB 2007

Each location we ban concealed carry posts an intangible flag atop that broadcasts harm could be inflicted within without defense for however long it takes police to arrive. And when police do arrive, will they act quick enough, or hang out in the hall for an hour before saving lives. I assert, one individual at every school should be required to concealed carry. The vetting process of selecting this individual should be lengthy and thorough. But I suggest this is how we stop school shootings.

Additionally, and even more concerning, is the vague language in this bill referring to “adjacent ground” where concealed carry could be banned. It places us citizens at the whims of someone’s opinion – that varies from city to city - as to where exactly the line is drawn.

Laws only contain law abiding citizens. Law-breaking, evil, drug inebriated persons do not follow laws.
