

Submitter: Robert Egner
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

HB 2005 bans firearms made by an individual which is a guaranteed liberty and inalienable right for the protection of the people. The state does NOT have the ability to remove one's ability to self protection. This bill would turn individuals that have made protected firearms immediately into criminals.

The fact is any lawmaker or legislator that signs on to such a bill is simply an oppressor and is the very reason our US founders ensured they wrote the second amendment. And more over the reason Oregon's founders and writers wrote an even more stringent right to protection!!

The founders fought against their oppressors to ensure our citizens wouldn't be victim to tyrannical behavior via British tyranny and Oregon's liberal regime seems to think its acceptable to now follow British standards of rule. That doesn't work in a Constitutional Republic or for our citizens.

This bill doesn't make anyone safer. In fact it dies quite the opposite considering those that make a firearm legally actually have for more knowledge of a firearms working, has more ability to diagnose a failure with the firearm, can quickly troubleshoot issues with others firearms etc and therefore are safer than the average person.

I strongly suggest stopping this bill from moving forward in any regard as it literally disregards all reason or logic and does nothing but make legal and knowledgeable firearms owners criminals!
