

Submitter: Ray Quisenberry

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

To Senate committee in Energy and Environment

My name is Ray Quisenberry, and I'm a 30 year Oregon resident. I strongly support SB 525. We are in the midst of a climate crisis, and I can't believe that people want to make the situation worse just to be able to have a tidy yard. Are we that callous? Don't we care about our planet? In addition, the folks that operate this equipment for many of the contractors are poorly paid and their health and hearing are being sacrificed when there are better, less damaging alternatives. If you really care about the planet, if we really care about community health, if we really care about worker safety, if you actually care at all, then you need to support this bill.

Thank you
