

Submitter: Charlie Shrum
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

I oppose HB 3390 since it restricts our American freedoms. Trapping, hunting, and fishing helps keep the wildlife healthy and from being overpopulated, while it creates valuable income for funding wildlife restoration projects. Fur sales are an important part because it allows people to use all parts of the animals and produces many jobs. Trapping is a useful tool that's needed now more than ever. Since I was a child, I have witnessed the mule deer population decline and the predators are strongly increasing. The use of fur benefits all of the ground nesting birds from turkeys, grouse, quail, and sage grouse. Fly fishing uses many types of fur for their businesses and cold weather gear.
