

Submitter: Reice Moyer  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB2005

This bill is a waste of taxpayer dollars. "Undetectable firearms" account for .005% of gun related crime. It is very obvious these weapons are not being used in negative forms. Undetectable or not, the guns still have rifling to give positive or negative results in bullet comparisons if used in a crime and recovered. The majority of folks who own or make these guns are law abiding citizens with the "Right to keep and bare arms" and infringes on the right to do so. This bill along with HB2006 and HB2007 are nothing more than a political ploy to remove our rights to own weapons and protect ourselves in public places while the state continues to turn the other cheek and allow criminals to walk the streets and continue to repeatedly commit crimes against anyone and everyone they want to at any point or place. Drive around the state and look at the homelessness problem caused by previous politicians and the damage caused, the taxpayer money spent for clean up, the taxpayer money spent to take care of the homeless and give them free services on US, the taxpaying, law-abiding citizens, and the loss of police funding to serve and protect. How does the politicians of this state expect it's citizens to be protected when the police have their hands tied by political nonsense. We need our guns to protect ourselves and our families from the crime ridden cities the politicians in Salem have created.
