

Submitter: Dale Middleton  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB2007

I'd like to say I oppose this measure because it makes no sense, nor will it keep citizens safe. Can anyone produce any numbers on public shootings in a public building by a person with a concealed carry permit? I bet it's closer to zero than a higher number. Do you think a person who's taken the time and money to do the safety class is the true danger here, or is it a person who's unlawfully carrying? I like knowing a good man with a gun who's been properly trained and is in the area in case of an emergency. Many of those men are ex police, military, firefighters, dads, moms, and others who pose no danger, except that they carry a gun, and that scares people who have no clue about guns or safety. Maybe when our political members realize that legal gun owners and people who conceal carry aren't the problem, then maybe we can start having a discussion on how to solve illegal gun use and carry. But until you stop condemning us who are legal and turn a blind eye on criminals, then poor bills like this one will continue.
