

This testimony is to oppose this bill , It is unfair to criminalize people who are currently law abiding citizens . We have some of the harshest gun control laws out there but unless enforced or upheld they do no good. Until you start addressing the root cause of the issues , mental illness and drugs , gun control will do no good. Get guns away from the criminals not the law abiding citizens that need protection because you're not fixing the problem. Knee jerk reactions to non fact based feelings are hurting law abiding people
