

Submitter: Soeren Johnson

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB525

I am in strong support of the gist of SB 525 in that it will work to prohibit future sales of 2-stroke engines. My only concern would be that 2026 is too far off, and that there are vagaries in the bill that might weaken its impact. Thank you for moving ahead with this issue!
