

Submitter: Eric Ross  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB2005

I completely oppose this bill and I don't even own a so called "ghost gun." It's this simple, ask yourself these questions before you vote:

1. The ban in other states is already being overturned, is this constitutional?
2. Will passing a bill that will be contested in court be worth it when we already see it being overturned in other states and know it will eventually be overturned in Oregon?
3. Am I being a good steward of taxpayer money passing a bill that the State is going to have to fight?
4. Criminals already don't follow the law, how will this actually stop criminals?
5. Criminals are low effort people and just steal what they need. Manufacturing a "ghost gun" cost money, takes skill and expensive tooling, knowledge to source parts, and requires effort. How is this possibly going to make anyone more safe?
6. Is there a better solution so we don't have to upset the long held traditions in Oregon of upholding the 2A? (Hint: the answer is Yes.)
7. Am I doing this to make myself feel better or because there is solid evidence this bill will save lives?
8. Why am I working so hard on something with such little return when we are losing kids everyday to fentanyl? Why am I not focusing on something that will actually save lives?
