Committee: House Committee On Judiciary
Measure: HB2007

Once again infringement on 2nd ammendment. "Gun free zones" allow the violent criminals opportunity to know where is safest for them to commit a crime. Logically if a criminal goes into a gun free zone they know that, likely, the law abiding citizen will NOT be carrying a weapon. However if this bill is STOPPED it may make the criminal think twice about committing the crime because while they don't value right vs wrong they likely do value their lives.

The only positive that would come from this bill would be knowing which places decided to be "gun free zones" that way I know who to support and who not to support.
