

Submitter: Shawn Schurter
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2007

To whom it may concern:

Do you really believe that a criminal is going to not carry a gun into a area that is posted "no guns allowed" Can you really believe that? By nature, a criminal is someone who doesn't abide by laws. Our current problem in the USA is not with law abiding gun owners. It is with the criminals which your DA's keep letting out. Lock the Felons up forever.

By passing house bill 2007, you are actually emboldening criminals, and making society less safe. Please look up the data on how many shootings are actually committed by CHL holders. There is also data that shows a big increase in violent crime in states that have enacted restrictions on concealed carry. Please target criminals, not law abiding citizens.

I oppose any additional restrictions on our 2nd amendment. I see them as chipping away our rights until only the criminals and government has guns. I think we all know where that leads to. Think The Holocaust and other tragedies in the past where government disarmed the population. Mass murder ensued and I firmly believe our Democrat party would partake in Mass murder or locking us up if we don't toe the line with our thoughts and words.
