

Submitter: R Roaninn

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Senator Golden and "profit at all co\$ts" committee members: are you AFRAID of the Dairy Assoc.? Why in the Sam Hill are you continually watering down SB 85 w/ add'l amendments?

SB 85-1 is the version to stick with; it's either save rural Oregon or leave a legacy that you \$old out.

As the Colorado River runs out, states around Oregon particularly California, and Arizona, are going to be looking for what they deem safe locations with water to live at. They have NO IDEA that gov't leaders in our state of Oregon are selling our clean air and rivers off to the highest bidder, aka large corporations like Foster Farms, to overtake our private lands, and bring their stinking profit making schemes into the soul and heartland of our forefathers!

Do not be a part of this. Vote in a moratorium so that agencies can be led by the will of the people, and not by lobbyi\$ts with money to throw around at election time. Think how it would be for you and yours to be driving through the countryside and find that Oregon now smells just as bad as the I-5 corridor going through Sacramento country.

Oregonians including you and yours, will not be richer, we'll be sicker unless you pass SB 85-1.
