

As a 17 year old that has been around firearms my entire life and has a hunter safety/hunter education card (certificate) I am worried about my rights being taken and being left with no protection or ways to hunt to provide food when I turn 18. Without being able to purchase a firearm till "21" young adults will not be able to purchase a firearm for protection from potential dangers in Oregon or other entities. As someone that is less than three months from turning 18 and planning to branch out and live on my own I will have three years of no self protection. While other young adults such as 18 year olds that join the military they are able to handle a firearm while a 18 year old civilian will not and as to the suicides for a fire arm are yes there are people that do and one is to many but instead of blaming a inanimate object blame our mental heath system for failing the our generation and not providing people with help the need. Many firearm crimes are committed with an illegally obtained firearm meaning it will not change in that matter. I believe they are trying to slowly disarm the people so they can not protect their rights and themselves from a tyrannical government.

"A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms shall not be infringed." the 2nd amendment
