

Submitter: Jody Draper
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2007

This bill addresses the Concealed Carry folks. When was the last time those were the problem? Like never. The police I have spoke to all say we need more CCW folks not less. They see them to be an asset not a problem. Wouldn't they know? So why then are we spending time and tax payer dollars on such frivolous bills? How bout we actually focus on the actually problem, the criminals themselves. We don't have a gun problem we have an idiot problem. Lets address the problem. If guns were the problem the gun shows would prove it. And they do. No shootings there. By this bill you restrict law abiding citizens, the ability to defend ourselves. Further, this is an infringement of women's rights, the equalizing ability to defend ourselves. This bill, as others, makes it clear you have a disregard for human rights ability to defend themselves in situations where mace, or other lesser means are not sufficient, evidenced in the news weekly or even daily in some areas such as Portland.
