

Submitter: Jered Evans

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

I strongly oppose this bill. This bill is based on emotion completely disregards any science on the issue. Fun is a green renewable recourse that can be ethically used for anything from clothing to fishing lures and this would outlaw all of that. This would also have a negative effect on native communities throughout the state. I hope everyone is willing to look at the science behind this issue and see the negative effects that passing this bill will have and make the correct decision of opposing it. Thank you for your time, Jered Evans
