

Submitter: Ben

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2990

As an active NET member, I am writing to you today to express my deep concern about the safety of our community in the event of an earthquake. As you know, our area is at high risk for earthquakes, and I believe that we need to take action now to ensure that we are prepared for the worst.

One of the most important steps that we can take to prepare for an earthquake is to establish community resilience hubs. These hubs would provide a safe place for people to gather and receive support in the event of an earthquake. Ideally they would be equipped with supplies like food, water, and medical supplies, as well as trained staff who can provide assistance and support to those in need. Additionally, the hubs would serve as a central location for communication and coordination between community members, emergency responders, and other organizations.

I believe that establishing community resilience hubs is a critical step in ensuring the safety and well-being of our community in the event of an earthquake. I urge you to take action now to support the establishment of these hubs in our community.

Thank you for your attention to this important matter.

Sincerely,  
Ben
