Measure: SB527

We OPPOSE this bill. This bill supports HB2006, and we strongly oppose HB2006. SB527 states that they have to “create exemption from antidiscrimination statute for enforcement of policies that impose agebased restrictions” actively stating that they are going to allow agebased discrimination in order to pass this bill and meet their own political agendas, instead of protecting the 2nd Amendment Rights of Oregonians. This year the Oregon Legislature is actively attempting to pass multiple legislation that ends up restricting and/or removing the rights of legal gun owners.
