

Submitter: Catherine McCarthy

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

Caging or trapping wild animals for the sole purpose of skinning them for their fur is barbaric and outdated. There are plenty of synthetics available. I support any measure which ends the unnecessary pain and suffering of another living being. We would not allow this to happen to cats or dogs so why are wild animals allowed to be exploited in this way? If someone was skinning dogs for their fur we would want them punished for animal cruelty.
