

Submitter:                   nicholas johnson

On Behalf Of:

Committee:                 House Committee On Education

Measure:                    HB2895

Please remove caps for students with disabilities, for whom we work so hard in our public schools to support and include throughout the school community. We need adequate resources now more than ever to properly support our students with IEP's. If not, we will continue to experience the destabilizing effects and further attrition of wonderful educators.
