

Submitter: Christopher Douglass
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2006

As a 5th generation Oregonian and US Navy veteran who was introduced to firearms in the Boy Scouts of America on my way to earning my Eagle Scout rank - this poorly aimed and written legislation is DEFINITELY not part of any solution! It is a solution looking for a problem! The problem is a small, ill informed population of citizens that do not currently own any firearms themselves, who falsely believe they would be safer if no one possessed firearms.

I have daughters ages 14 to 20 years old, so this unnecessary bill would impact both of them. As a family we enjoy hunting and associated firearm activities. Prohibiting my daughters with the means of self defense and recreational enjoyment of firearms would violate their Constitutional rights and God given right to keep & bear arms. Infringing upon their rights is not open to "Ballot Box" decision making! As a DPSST trained and licensed Executive Manager certified professional, I also find this bill to be a solution looking for a problem. I see and hear little evidence that this is an issue worthy of legislation.

Kill this bill!
