

Submitter: Trapper Spencer  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB3390

I am a wildlife specialist in the state of Oregon. Me and my family definitely oppose this bill. The responsible harvest and sale of fur is one of Oregon's many renewable resources. It would be disgraceful to the history of our state and the people who pioneered this place. My family and I are close to just calling it quits and leaving this state and if this bill passes that will probably be it. I grew up in this state and the recreational activities have declined big time. The state wants more and more money for tags, licenses and fees but they take away more and more opportunities. Less fishing to be had, less hunting to be done and the predator population is seriously depleting our deer, elk, and antelope herds. I work with wildlife for a living, so I should know.
