

Submitter: Karl Ekberg  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB3390

Stop this bill immediately! The Hareline Dubbin Co., LLC has been a fly tying supplier to us for many years, offering many products which this bill will ban, that are essential to fly tying for fly fishing in our business and many others across the country. There are not synthetic materials to take the place of these natural furs and feathers, what so ever! We are only a small fish in the pond compared to others who purchase from this business located in Oregon, but banning such products for sale will clearly have an adverse economic impact on not just a company located in your state, but many across the country. Please stop and think about the large scope of what the impact of implementing this bill will have, not just in Oregon, but many other businesses across this great country as well.
