

Submitter: jonathan cox

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB348

you dont need a committee to do this, ill tell you for free.. first of all make drugs illegal again, second just enforce the laws already on the books. the people that break the laws (already in place) need to actually do some time instead of givin a slap on the wrist and sent on thier way. get rid of the drug problem and the unlawful gun problem will largely go away with it. empower the police to do thier jobs effectively and constitutionally. you have literally created this problem with your policy of leniency on real criminals but of course you need more money and a committee to shift the blame somewhere else..
