

Submitter: Jim Terborg
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

I recommend animal hair commonly used in fly fishing and fly tying, such as deer hair, elk hair, squirrel hair, fox hair, rabbit hair, etc., be exempt from this bill. There would appear to be no environmental or criminal reason to prohibit the sale of fly tying animal hair. If this law is passed as is, it will have a negative economic effect on fly shops and fly tying supply businesses. And, those of us who tie our own flies for personal use will simply order these materials from other fly shops out of state. I urge you to exempt these types of animal skins from this bill. Thank you
