

Submitter: Keaton Zyskowski  
On Behalf Of: Outdoorsman  
Committee: House Committee On Judiciary  
Measure: HB3390

Hello,

I am reaching out to you from another state to express the importance of not letting this bill be passed. This bill affects a key part of anglers not only in Oregon but also nearby states, countries and globally. This could affect so many small businesses in so many places that play a key role to a lot of travel, mental health, financial health of small towns and the health and care of local watersheds. If people can't fish because they don't have the gear they need, then they will let these places go to waste and less money will be spent in local economies. Fisherman and outdoorsman and women play a key part in conservation globally. As we love to fish, we also love to see, breathe and be apart of every aspect of the outdoors.

I hope you really consider opposing this bill and the affects it could play on local and state level economics, mental health and a important industry to many people.

Thanks for reading and considering,  
Keaton
