

Submitter: Pete Johnson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

The fur trade is America's oldest industry. There is a lot of history and traditions deeply rooted in it and it must be protected at all cost. The sale and procurement of fur is already highly regulated by state biologists and departments specializing in wildlife management. They have ensured that the resources will be protected for future generations. Fur is a renewable, sustainable resource. Please vote no on this bill.
