

Submitter: John Hodnett

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

this measure would have devastating effects on the livestock industry. Predator control alone cannot control the damage from predators, irrigation, flood damage to roads and farm land.

With an explosion in the wildlife population there will be diseases both to wildlife and humans

Under this bill average sportsman will not be able to do any control on predators as their cost would be prohibited

I urge you to vote no on HB3390
