

Submitter: Connor Harris-Swem

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3390

To add on to my other testimony, if this bill would force the use of synthetic materials when making fly fishing flies. Flies are frequently lost while fishing, and a greater usage of synthetic materials would lead to a greater amount of non biodegradable materials and pollutants entering our waterways, such as micro plastics and other petroleum based products. This could only damage our rivers, lakes, and fisheries.
